Exam : C9020-668

Title : IBM Storage Technical V1

Version : DEMO

1.What is the function of Copy Export Within an IBM TS7760?

- A. Creates copies of data on tape for disaster recovery.
- B. Exports data to be read by third party tape drives.
- C. Moves data out of cache to provide more space.
- D. Copies data between grid connected IBM TS7760s.

Answer:A

Explanation:

The copy export function allows a copy of selected virtual volumes that are written to the TS7700 to be removed and taken offsite for disaster recovery purposes.

2.Which resource informs a storage specialist if a Technical and Delivery Assessment (TDA) has to be done?

- A. IBM Pre-sale TDA Checklist
- B. Systems Assurance Product Review Guide
- C. Trigger Criteria and Designated Product List
- D. Digital Techline Center

Answer:A

Explanation:

The Technical Delivery Assessment (TDA) pre-installation checklist and worksheets document provides several worksheets that the customer must complete for each XIV system. Use the worksheets to record information that is needed by the IBM installation planning representative (IPR) and IBM service representative to install and configure the XIV system.

3.A customer with NAS and block storage is booking IBM Software-Defined Storage as a means to improve storage efficiency within a data center.

Which product from the IBM Software-Defined Storage Control will help the customer?

- A. IBM Spectrum Archive.
- B. IBM Spectrum Protect
- C. IBM Spectrum Accelerate
- D. IBM Spectrum Virtualize

Answer:A

Explanation:

4.A customer has multiple tiers of storage, is experiencing high growth, and has issues with managing a complex environment. Simplifications, ease of management, and storage efficiencies are key requirements.

Which product meets the customer's requirements?

- A. IBM Flash System 900
- B. IBM DS8884
- C. IBM Storwize V5020

D. IBM Storwize V7000

Answer:A

Explanation:

5.How does the integration of IBM with IBM Flash System with IBM Spectrum Scale improve analytic environments?

- A. Allows storage of metadata on flash to reduce latency
- B. Creates replicated copies of data for high availability and disaster recovery
- C. Enable Spectrum Scale applications to share common data pools
- D. Provides resource management across a range of physical media types and data protocols

Answer:A
